

To whom it may concern,

My name is Jim Busa, I am Maxton's father, and I would wish to testify on behalf of Bill HB 5366. I wish to have the state consider revising the CT Motor Vehicle Statutes to allow drivers with vision impairments to obtain a CT driver's license with the use of bioptic lenses.

As a parent of Maxton, it is heart breaking to speak with him when he brings up the topic of not being able to drive, especially at his age, where all his friends are excited and talking about learning how to drive and what kind of car they want. People with vision impairments already have enough obstacles in life that they need to navigate, having to worry how to go about to get to work, and running important errands should not be one of them. They deserve the freedom that anyone else has in being able to go about living their daily lives.

Thank you for your time and consideration,

Jim Busa
